```
4: while v is not a leaf do
5:     if v is a query node then
6:         Process Query Node                          ▷ Algorithm 2
7:     else                                            ▷ v is a forget node
8:         Process Forget Node                         ▷ Algorithm 3
9: return the output of v
```
