Diagram illustrating a sequence of transformations or equivalences between two representations of a system. The diagram is structured as a sequence of three main components connected by equals signs ($=$).

Leftmost Component: A diagram showing a system with two stacked boxes. The top box is labeled $\mathfrak{a}_{\mathcal{M}}$ and the bottom box is labeled $\mu_{\mathcal{M}}$. Arrows indicate the flow of information or data:

- Top box ($\mathfrak{a}_{\mathcal{M}}$):
 - Input: V (downward arrow)
 - Output: V (upward arrow)
 - Output: $S_q^m \mathbb{V}$ (upward arrow)
- Bottom box ($\mu_{\mathcal{M}}$):
 - Input: $\mathbb{V}$ (upward arrow)
 - Output: $\mathbb{V}$ (downward arrow)
- Overall flow:
 - Input: $\mathbb{V}$ (downward arrow)
 - Output: V (downward arrow)
 - Output: V (upward arrow)
 - Output: $S_q^m \mathbb{V}$ (upward arrow)

Middle Component: A diagram showing a system with a single box (implied by the arrows) and a curved arrow indicating a feedback loop or transformation. The inputs and outputs are the same as the leftmost component.

Rightmost Component: A diagram showing a system with a single box (implied by the arrows) and a curved arrow indicating a feedback loop or transformation. The inputs and outputs are the same as the leftmost component.
