BEING AT-WORST-NODAL OF RELATIVE DIMENSION 1 IS STABLE UNDER BASE CHANGE

THE STACKS PROJECT AUTHORS

Editorial note. Statement span is lines 13306-13310 of sources/stacks-spaces-more-morphisms/pinned-original-source.tex; proof span is lines 13312-13317, the complete author proof (4 body lines).

Editorial note. Navigation stubs: 2 cited-but-not-included labels are supplied as non-load-bearing pointers with their pinned tags where the snapshot tag index has them.

Editorial note. extra_packages is empty on purpose: the retained preamble already loads xy with options and a second declaration clashes in the assembler wrapper.

Editorial note. Text is retained verbatim, including the author's own typos and placeholders.

Editorial note. BORDERLINE for Chief: the two-sentence see-X-and-Y proof is the shortest accepted so far (pure two-reference pointer with the composition named but unwritten); accepted because the composition is a definitional one-liner and both endpoints are exact, flagged for possible pointer reclassification. Family-of-curves permission card.

Allowed standard prerequisites (editorial).

- Explicit prerequisite boundary. Definition of at-worst-nodal of relative dimension 1 (chapter/Morphisms of Spaces definition); Morphisms of Spaces, remark base-change-P; Algebraic Curves, lemma base-change-nodal-family.

Source reference. Original lemma 0C5B: sources/stacks-spaces-more-morphisms/pinned-original-source.tex, source lines 13317–13317. Cited by the retained statement or proof but not part of the collected spans; supplied only as a navigation pointer. The argument does not depend on its content.

Source reference. Original lemma 0AMM: sources/stacks-spaces-more-morphisms/pinned-original-source.tex, source lines 13317–13317. Cited by the retained statement or proof but not part of the collected spans; supplied only as a navigation pointer. The argument does not depend on its content.

Lemma 0.1. *The property of being at-worst-nodal of relative dimension* 1 *is preserved under base change.*

Proof. See Morphisms of Spaces, Remark 0AMM and Algebraic Curves, Lemma 0C5B. □

Date: stacks-project:spaces-more-morphisms.tex:local-snapshot-20261011; GNU FDL 1.2 or later.
